

“KURIS KURĮ”

TECHNICAL LIGHTING REQUIREMENTS

Preferred lighting control desk/console: Avolites Quartz + External touch screen;

ChamSys MagicQ MQ50 or similar would also suffice. Bringing our own console is also a possibility.

Fixtures: Fixture type and count highly depends on the venue size and other properties. For a venue stage size of approx. 10m x 10m the desired fixture selection would be:

1. 8 x wash fixtures (CLAYPAKY MINI-B or similar)
2. 4 x spot fixtures (CLAYPAKY Axcor Spot 300 or similar)
3. 8 x Generic RGB BAR fixtures (SHOWTEC Sonus Bar 8 or similar) with 2 lighting stands for mounting 2 bars vertically on each stand.

Other equipment: all the necessary power and DMX cables and splitters to safely run the mentioned equipment.

Lighting control desk placement position should allow a good view of the stage.

The mentioned equipment is a very broad approximation, we take into consideration each individual venue and technically adapt to make the performance possible.
